# split Finance

SOLANA RADAR HACKATHON

# Seeker

0 USD\*

# Buy Now Pay Never

with yield from your staked assets

# Yield generated could be used to pay for real world expenses today

\$5B

TVL of yield bearing assets on Solana with limited applications.  
Yield could be used elsewhere today.

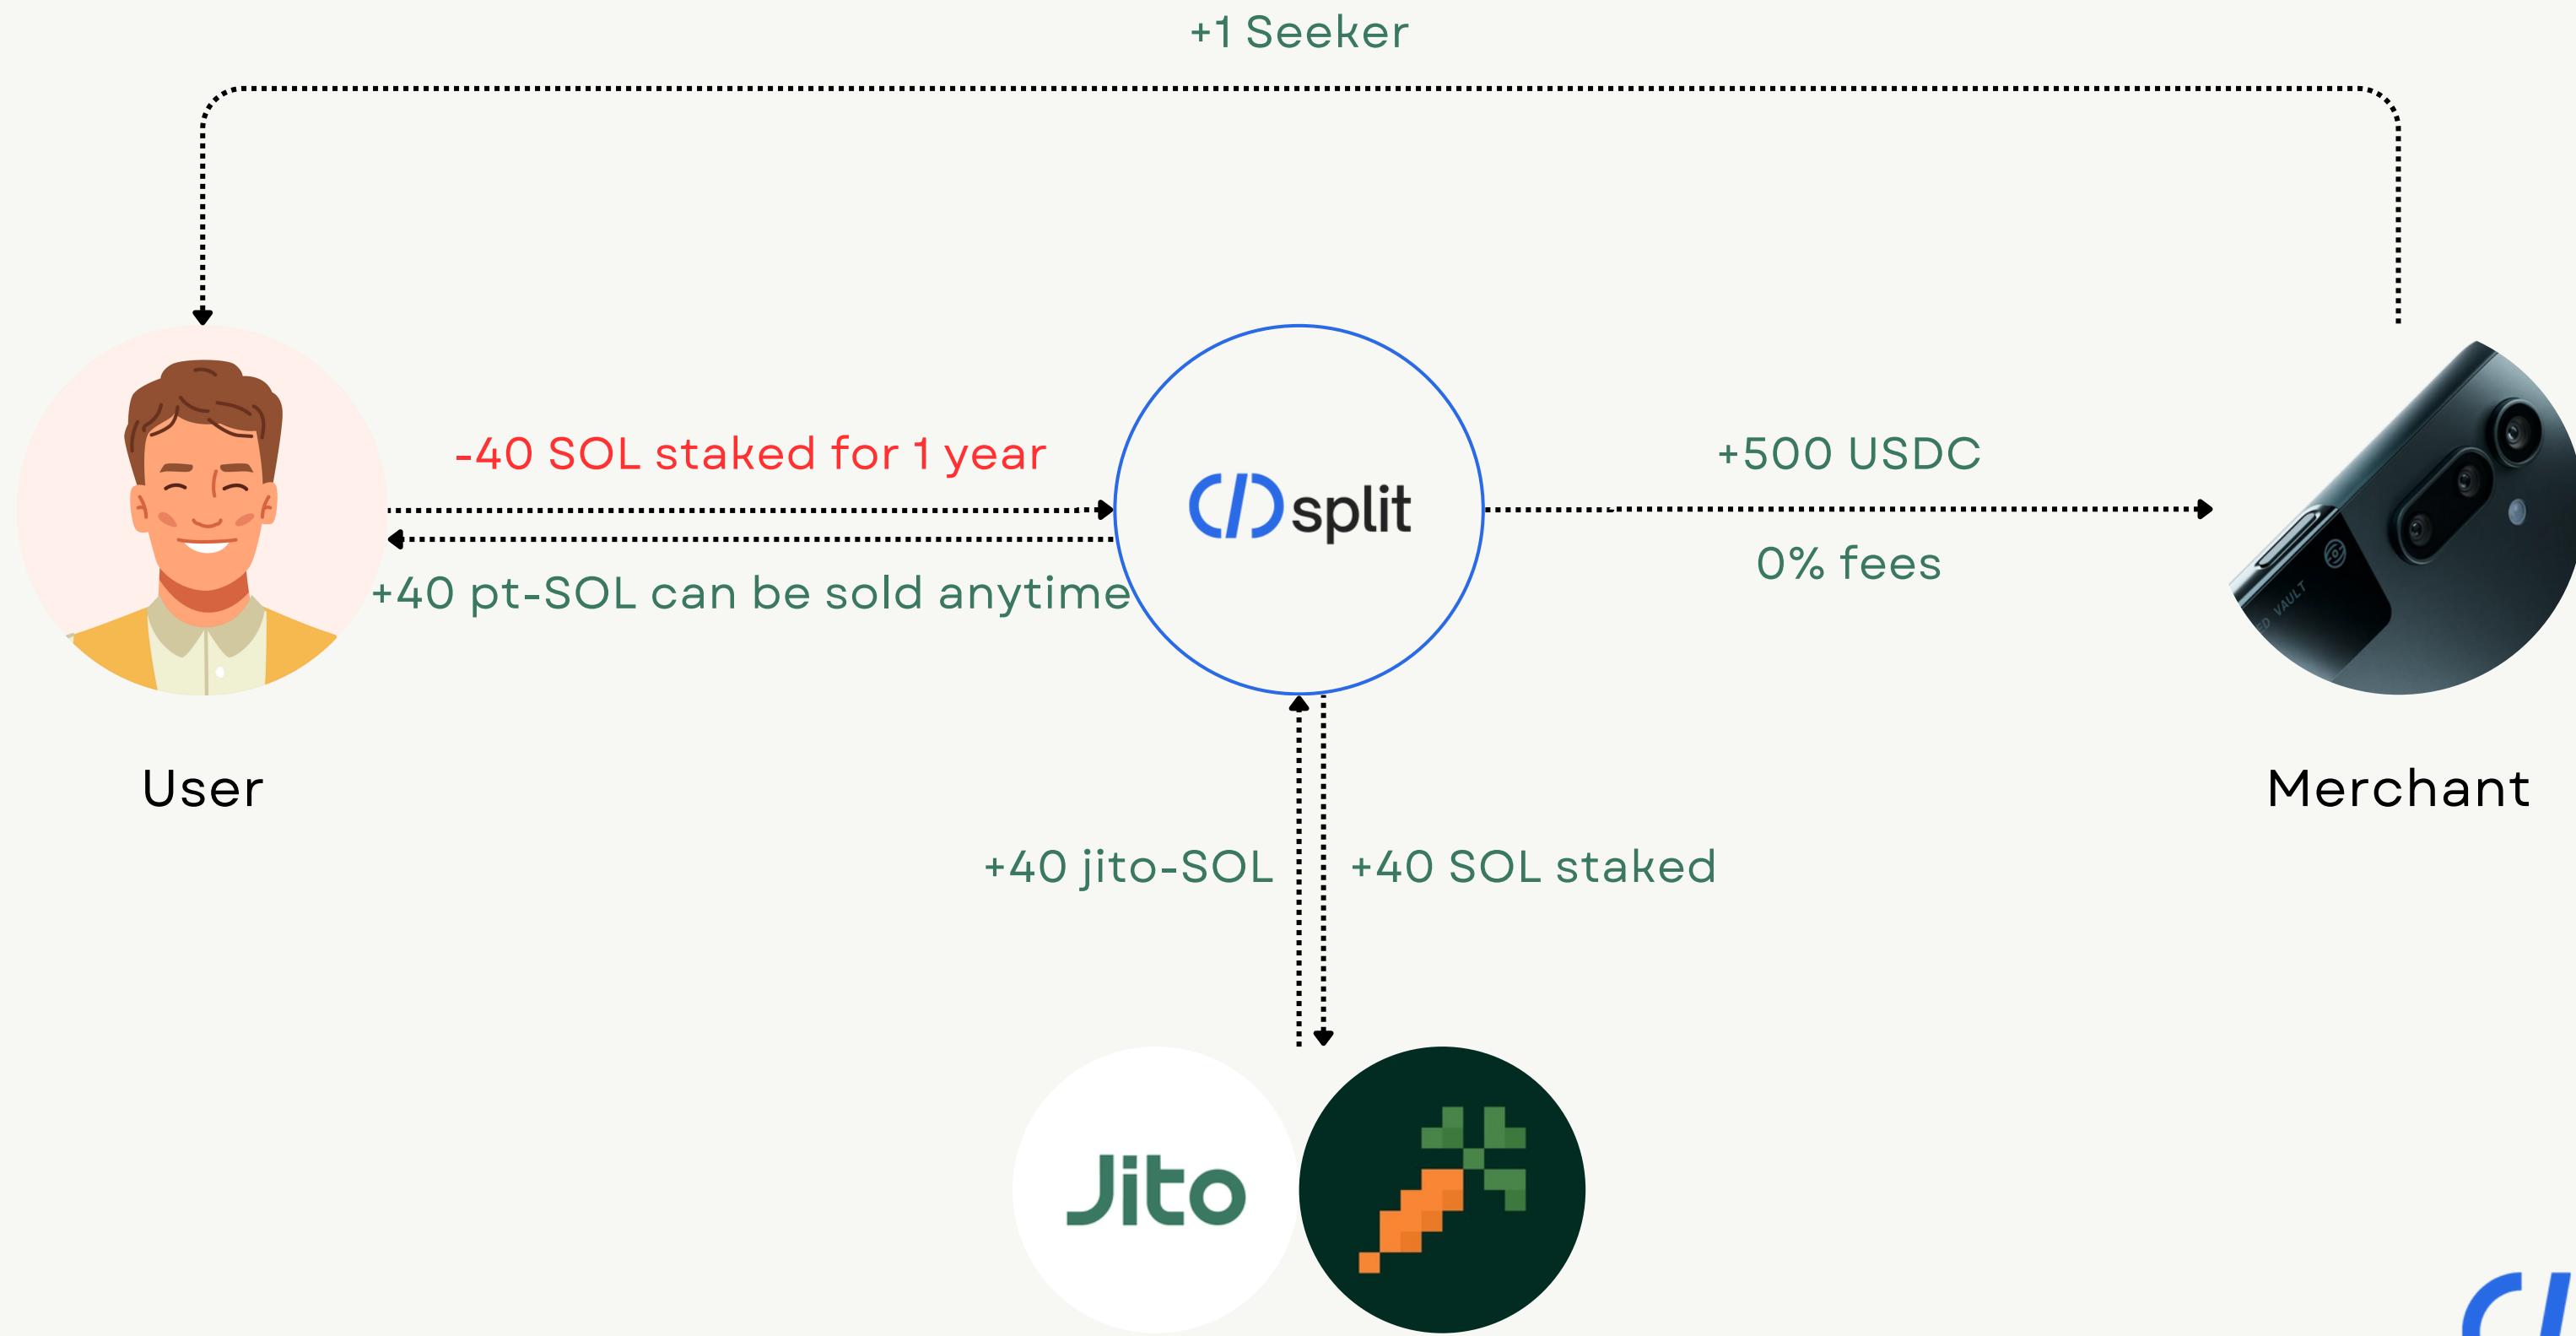

1-5 days

Time it takes to off-ramp crypto into bank account.  
Off-ramping process is cumbersome and not widely available.  
Users forgo potential capital gains by selling underlying asset.

2-4%

Fees merchants have to pay for credit card acceptance.  
Current lack of subscription based payment models in crypto.  
Unsustainable creator economy model in crypto where creators have to dump tokens on followers for steady revenue.

# Unlock your yield today

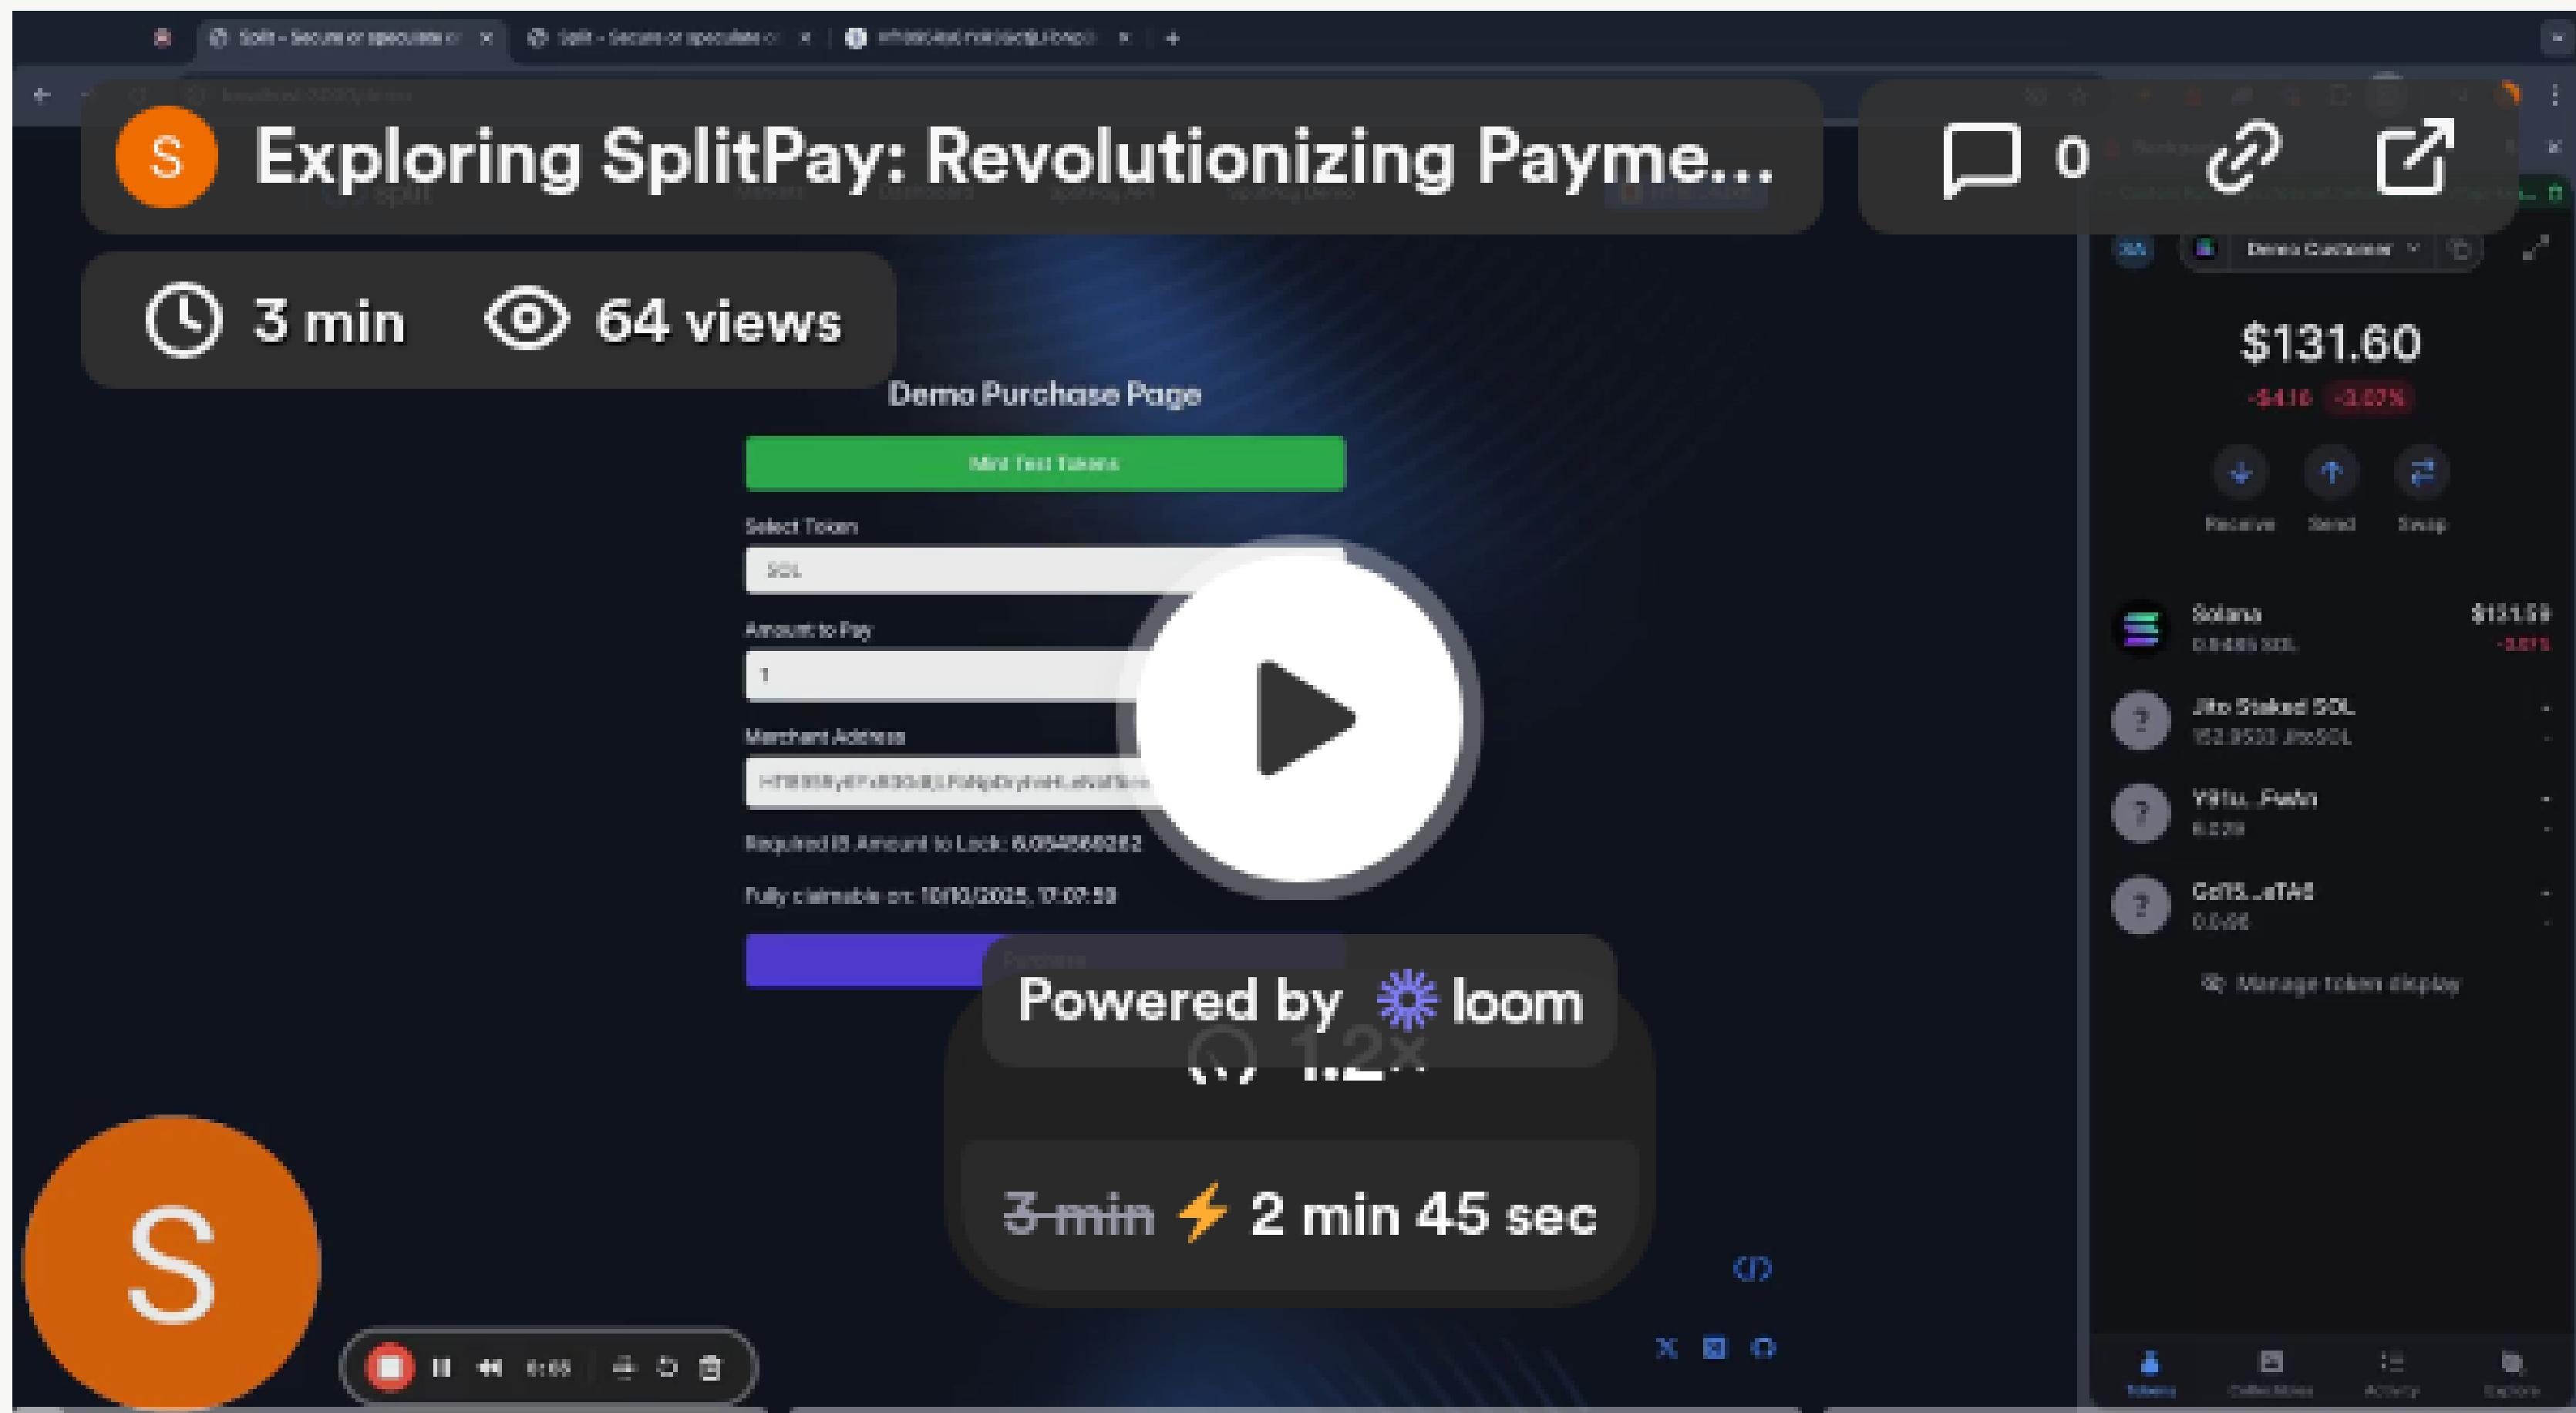

**CD split**

# A better model for subscription services and content creators

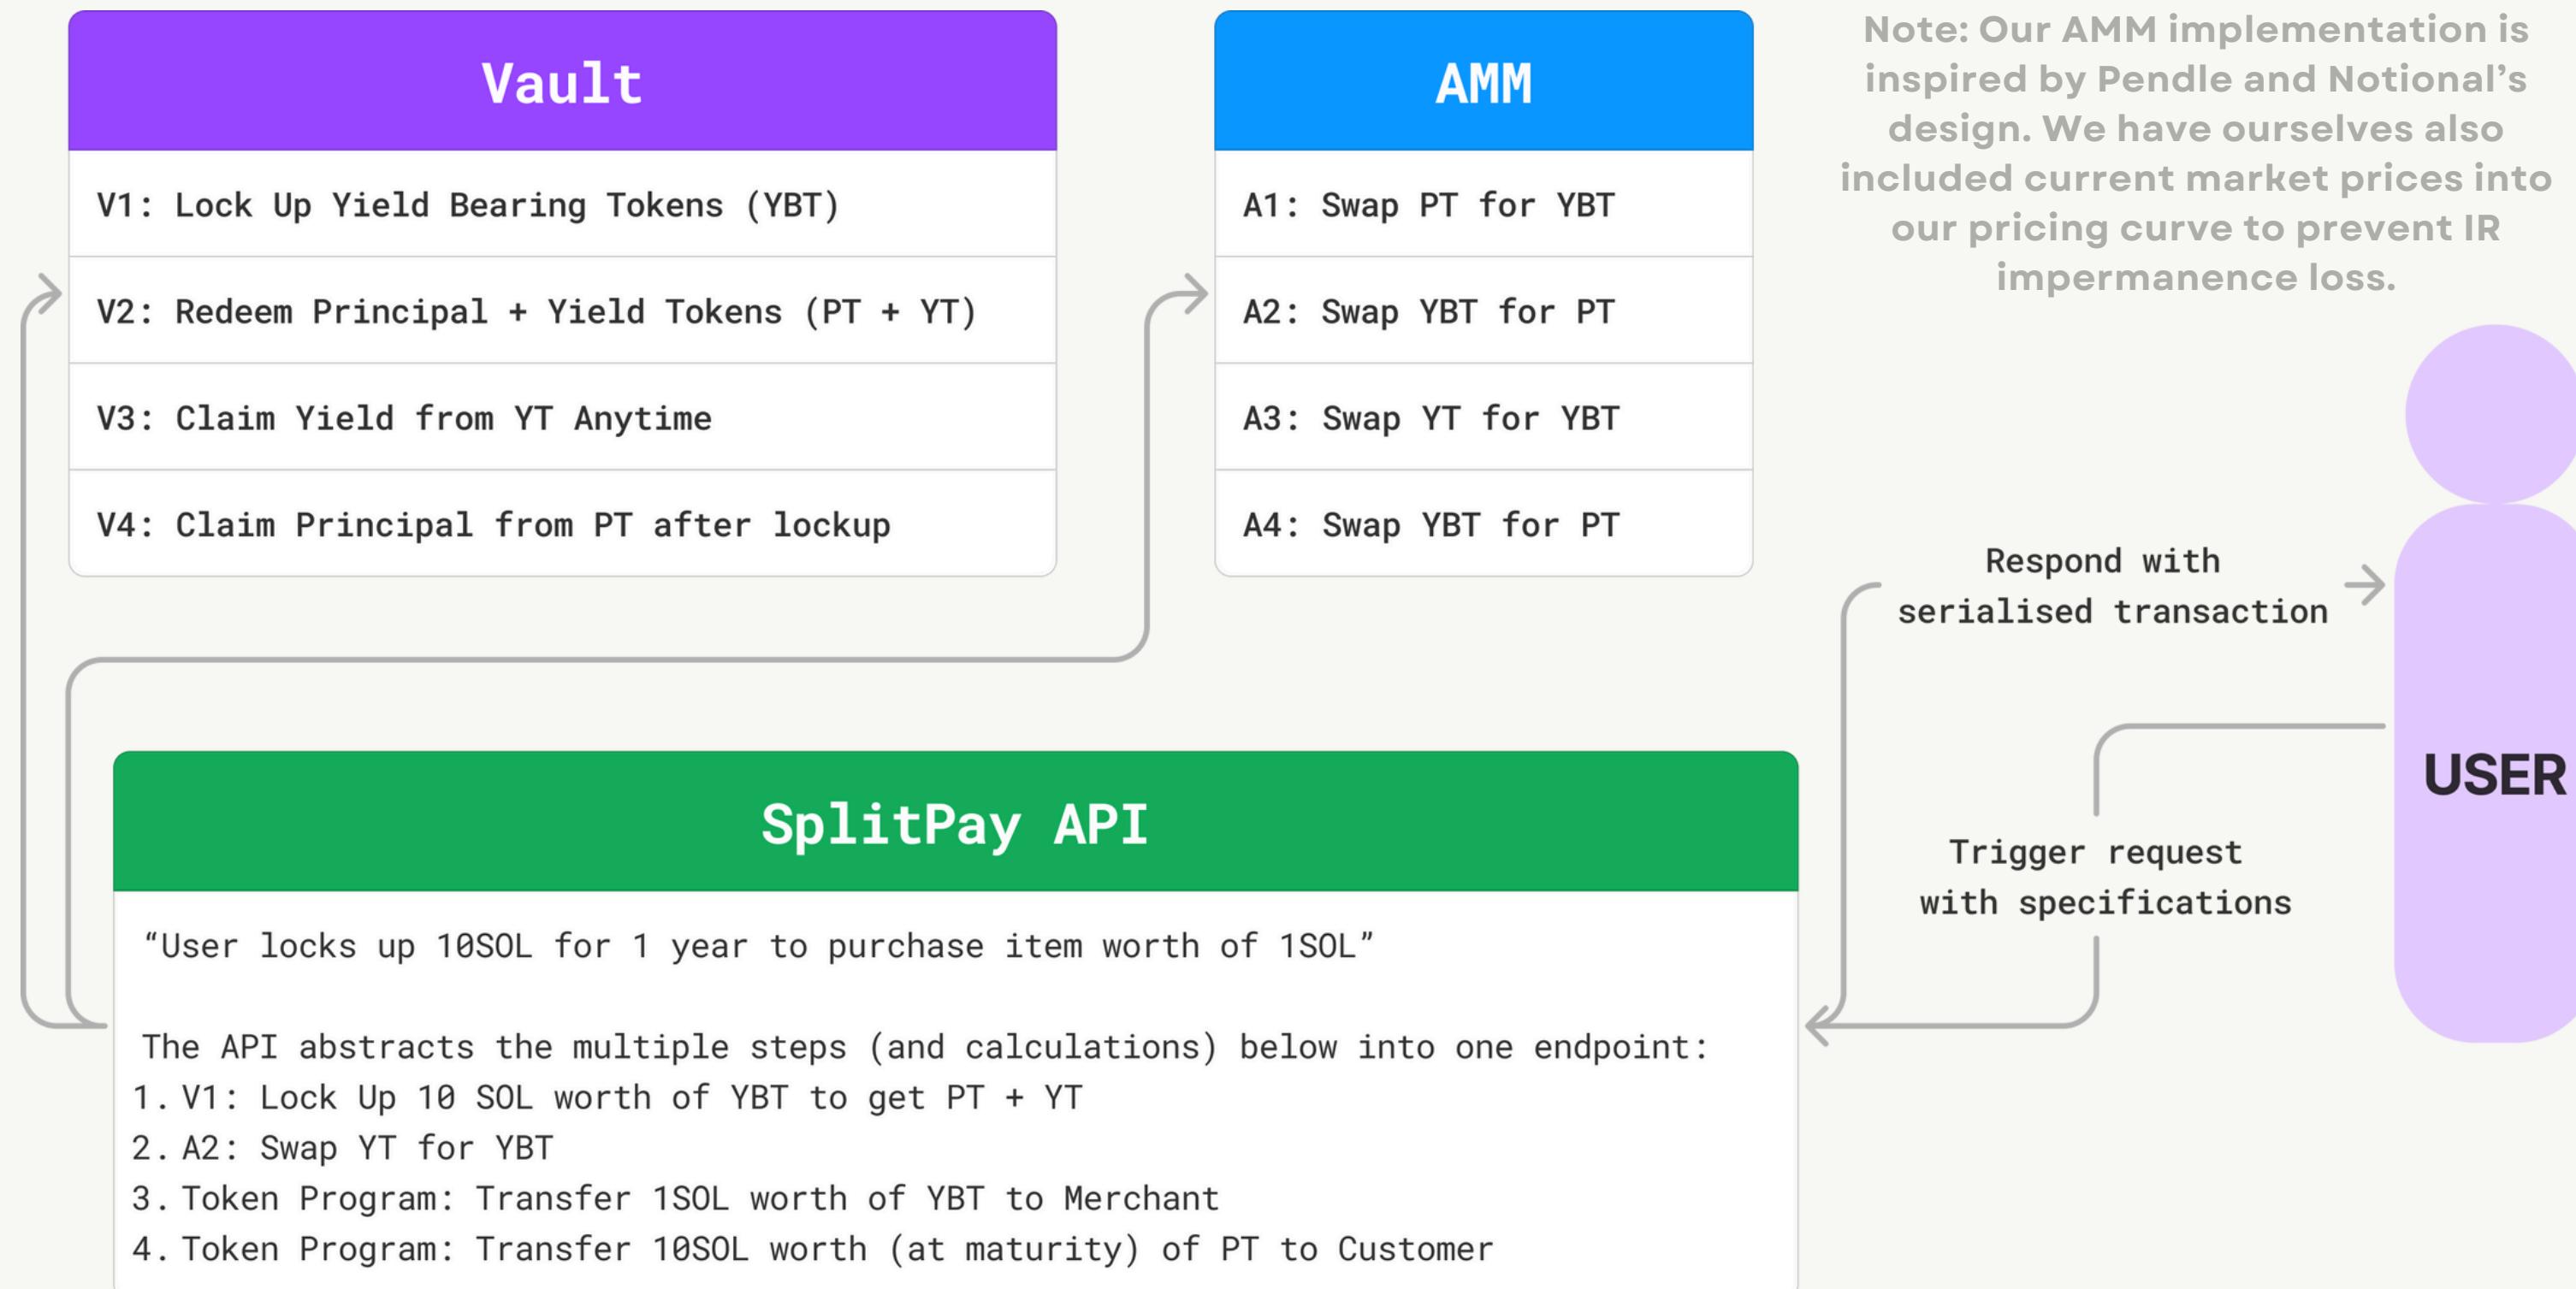

\*pt-SOL can be redeemed 1:1 SOL at the end of maturity

# Quick Demo Video

# API Architecture

## for users

- yield unlocked and used today
- no off-ramping required
- potential capital gains not forgone from selling underlying asset
- flexibility in managing staked assets

## for merchants

- more options for accepting crypto payments
- simple API integration
- near instant settlement
- settlement in stablecoins
- abstraction of on-chain interactions

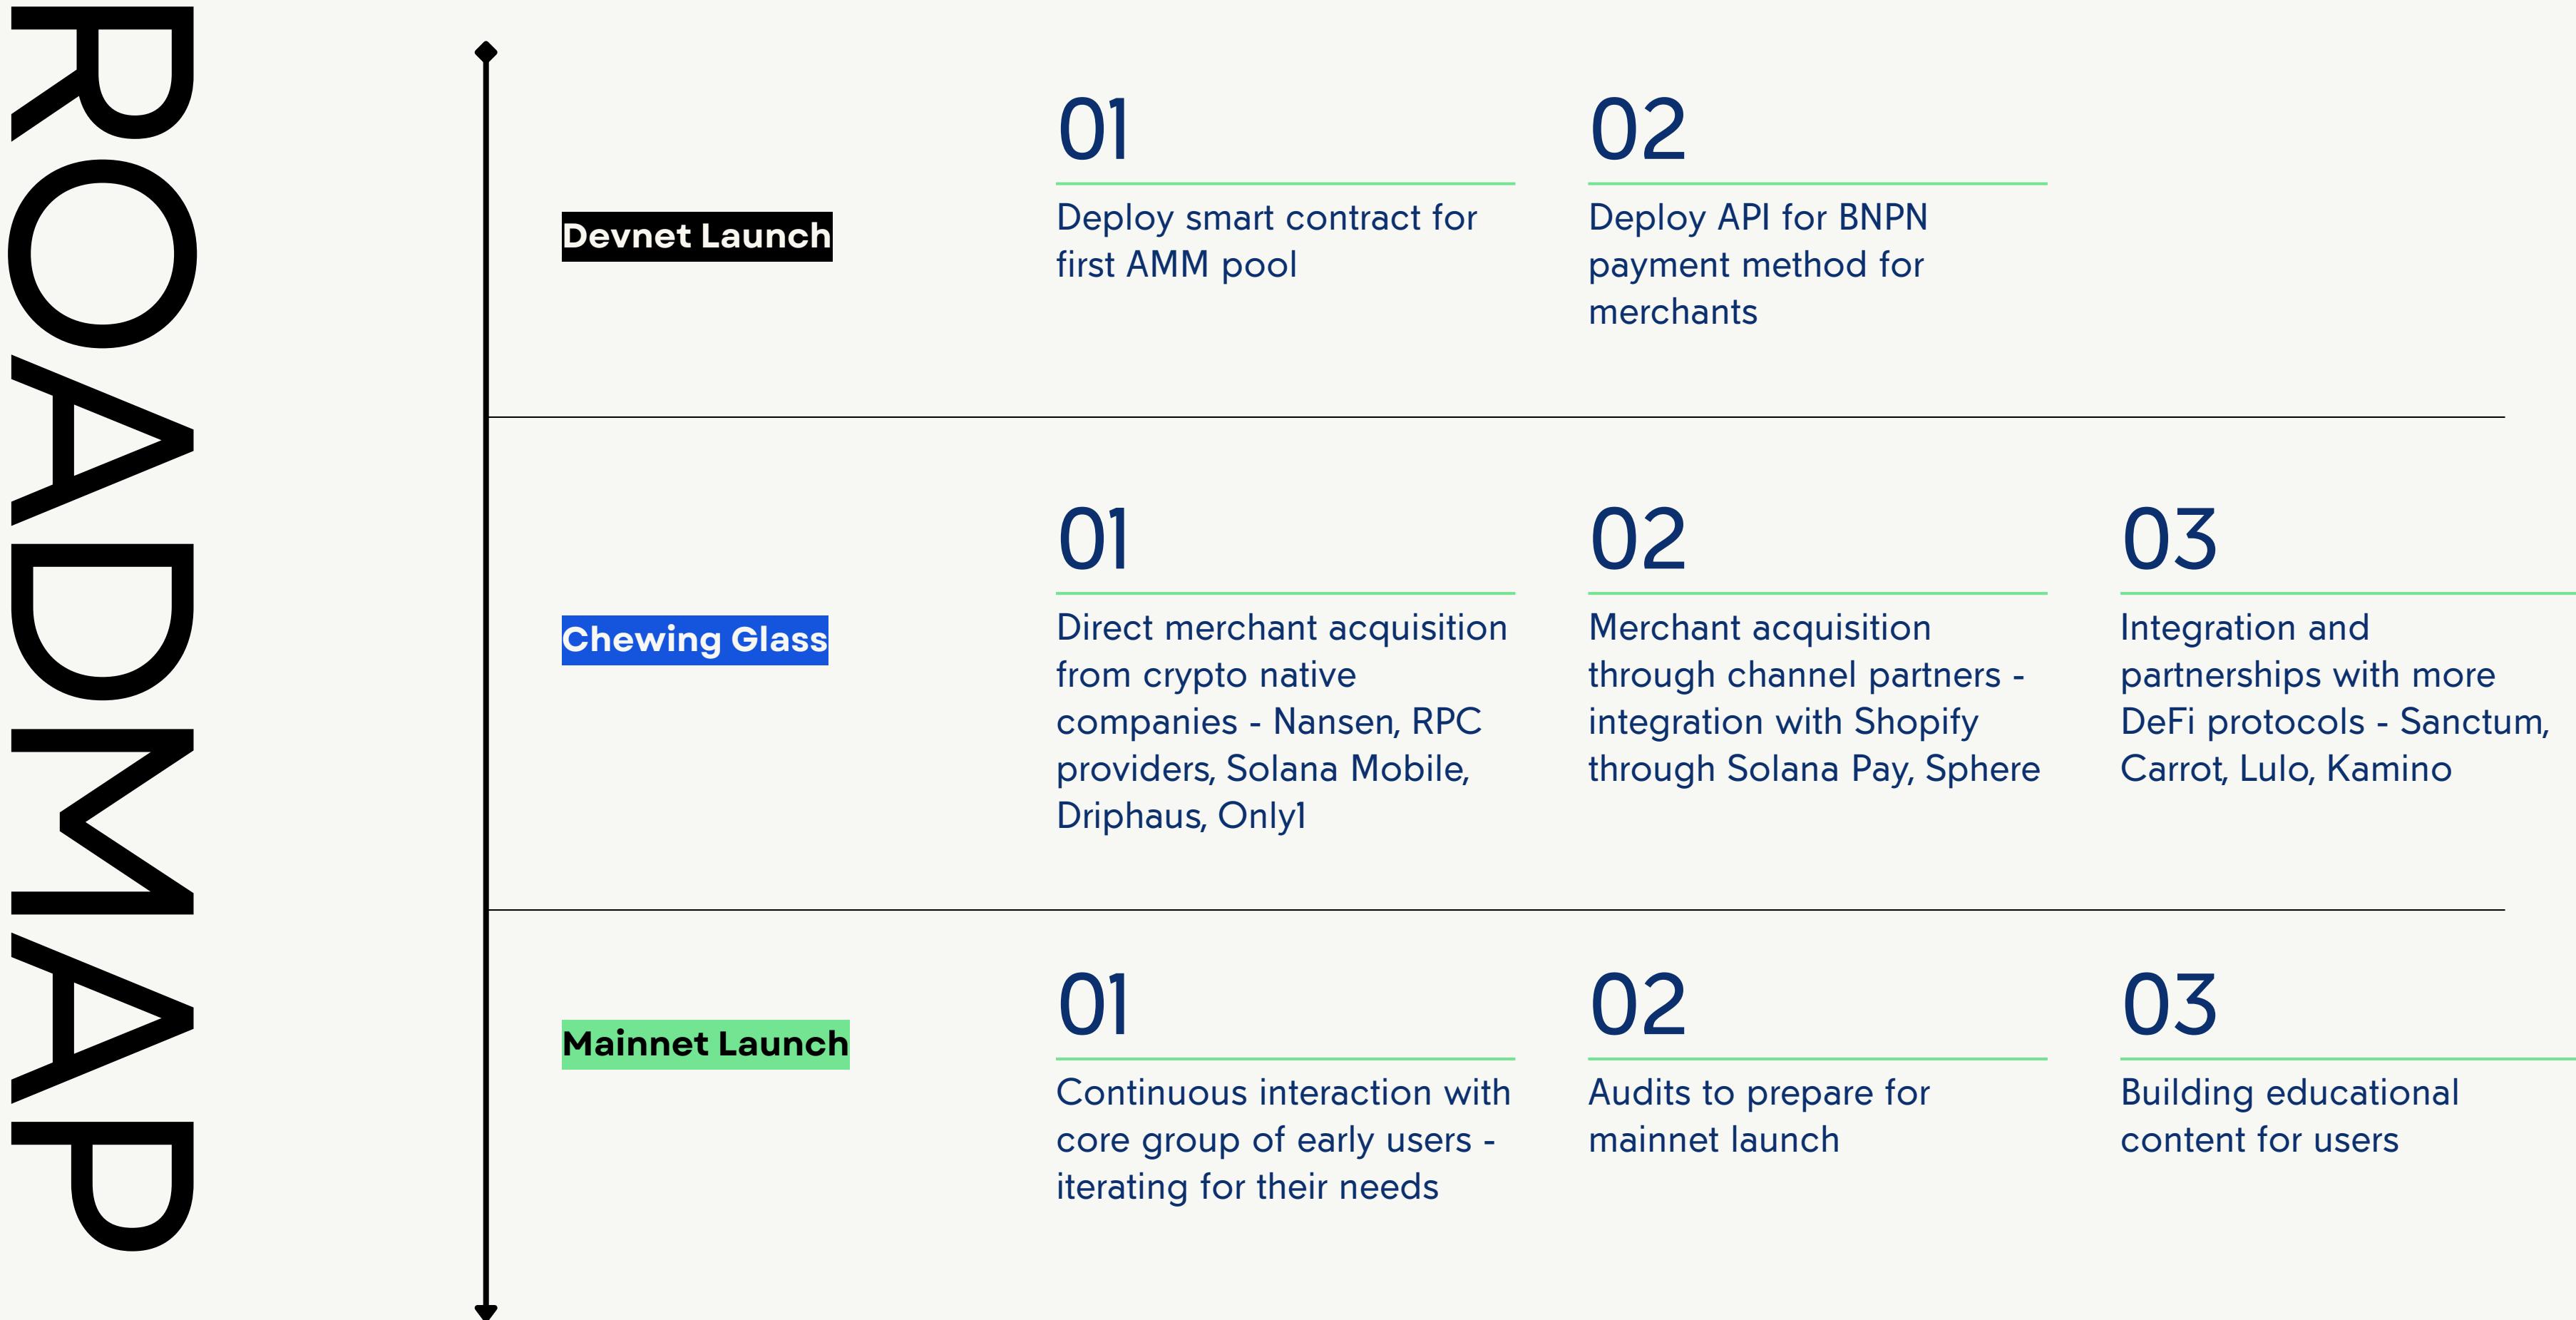

## for creators

- subscription based model
- no dumping of tokens on followers for revenue
- lock in followers for longer periods

# A payments solution built on top of a DeFi protocol

Split Finance offers a payments API with multiple applications from e-commerce to monetisation methods in the creator economy.

Built on top of a trustless DeFi protocol, enabling flexibility to users to manage their yield bearing assets and trade them freely. Unlocking the yield on Solana today.

## Payment API

- 0% merchant fees
- Only possible on Solana with minimal transaction fees
- Incentivise merchants to adopt payment method

## AMM Pool

- 0.1% trading fees from AMM pool
- 3% of all yield collected from staked assets
